

Voiant and Anaplan are Re-Shaping the Way You Plan Territories

This new solution created by Voiant provides precise location data and powerful developer tools that are helping to change how we navigate the world.

We have integrated this new technology with Anaplan to create territory visuals that allow you to see if you have the right territories set geographically and financially.

Key Benefits

Visualize key account metrics by State, County, or Zip Code.

Replan territory boundaries through point and click, drag and drop, or lasso interactions.

Seamless bi-directional integration with Anaplan data for real-time analysis.

View the impact of territory changes before saving back to Anaplan - model, adjust, visualize, finalize.

About Voiant

At Voiant, we help you – our clients, partners, and people transform and grow as part of your digital journey. We achieve results through a practical, collaborative approach that navigates an ecosystem of the world’s top technology innovators to deliver value tailored to you.

What Our Customers Say

“I was impressed with the Voiant team at our first scoping session. They left no stone unturned in helping us to position the selection of Anaplan, and Voiant as our implementation partner. The implementation project itself has been great.”
